- Declined Services during Intake

## Program Enrollee Outcomes

- Currently Enrolled
- Successfully Achieved All Goals and Unenrolled
- Successfully Achieved Some Goals and Unenrolled
- Disengaged in Services

**247**

Program Enrollments  
This Quarter

Flagler Cares' clients often present with multiple needs, and our goal is to assist them with as many of those needs as possible. It is also common for clients to present with one immediate need and for them to identify additional needs as our Care Coordinators get to know their situation. The result is that clients often enroll in multiple programs during their time with Flagler Cares and leave us with significantly improved outcomes in various areas.

This quarter, Flagler Cares' Community Programs team logged a total of 247 new enrollments. Of those, 10 entered the SOAR Program, 29 entered the Behavioral Health Program, and 208 entered the Care Coordination Program where they were assisted with a multitude of needs simultaneously.

Taking into account clients who began services with us last quarter and found success this quarter, a total of 307 unduplicated individuals (and their households) were engaged in care at Flagler Cares this quarter.
